

Standard samples

A standard sample is a sample of grain that represents the minimum visual quality for a specific grade of grain. After a Canadian Grain Commission inspector has inspected your sample, we may ask you for another sample so we can prepare standard samples for this crop year.

If you agree to take part, we'll

- send you two bags to fill and return. Each bag holds about 20 kilograms of grain
- cover shipping costs
- pay you for the grain you send (\$20/bag for pulses, \$10/bag all other grains)
- send you a certificate for a free grade and protein assessment at any Canadian Grain Commission service centre (located in Saskatoon, SK; Weyburn, SK and Calgary, AB)

Important dates

November 30, 2020	Please mail your samples by this date.
December 31, 2020	We won't inspect or analyze samples received after this date.
April 1, 2021	Last day to get your results online. After this date, you'll have to contact us by phone or email.

Account updates, corrections or questions

Contact the Harvest Sample Program if you need help with either the online application, or updating your account information.

Online	You can update your Harvest Sample Program account at grainscanada.gc.ca/hsp . Forgot your password? Email itshelp-aidesti@grainscanada.gc.ca or call 1-866-873-1660.
Email or phone	To update: <ul style="list-style-type: none"> • email address • crops or the number of envelopes we send • mailing address • phone number • farming status (for example, you retired or want to transfer your account to a family member)

If you need more information or have questions, provide your **producer identification number** and contact us:

Email: harvest-recolte@grainscanada.gc.ca

Telephone: 1-800-853-6705

Teletypewriter: 1-866-317-4289
Select "Harvest Sample Program" from the menu.

This is your Harvest Sample Program producer identification number:

Use this number to access your online harvest account.

Your results will automatically be sent to your email address. To update your email address, email harvest-recolte@grainscanada.gc.ca and include your producer identification number.

Did you know?

- Five varieties of Canada Western Red Spring wheat will move to the Canada Northern Hard Red wheat class on August 1, 2021. These are AAC Redwater, AC Domain, Muchmore, Vesper and 5604HR CL.
- Even if you have a good idea of your grain's grade, submit a sample! Your samples are crucial for marketing and research on Canadian grains.

Harvest Sample Program Instructions

Record your sample numbers

Before you send your sample, record your seven-digit harvest sample number, which you can find on the back of each sample envelope. This is unique to each sample and is different from your producer identification number.

Decide on your own identification system for your samples, such as growing location or bin number. Record and keep this on file.

Your sample identification

Take a representative sample

The grade, dockage, moisture and protein of your grain can vary within a field, bin and from truckload to truckload. Proper sampling, mixing and dividing procedures will help ensure the sample taken accurately represents your grain's quality.

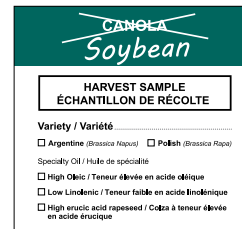

Your samples are used to generate crop quality data to facilitate the sale of Canadian grain. To best reflect the quality you produced, send us samples which are representative of the crop you have just harvested.

Full instructions on taking a representative sample are available at grainscanada.gc.ca/sampling.

Submit your samples

Step 1. Complete information on envelope

- If you received an envelope for a commodity you didn't grow this year, cross out the commodity name and write the name of the commodity you are sending in the white space on the envelope.

Step 2. Pour grain sample into envelope

- Pour a representative 800-gram sample of your grain up to the "fill" line printed on the inside of the envelope.

Step 3. Remove backing paper from envelope

Step 4. Seal the envelope

Step 5. Mail

- Mail us your sample(s) as soon as you finish harvesting your crop or before November 30.

How to get your results

Your results will be available within 20 business days of the Canadian Grain Commission receiving your sample. **There are 5 ways to get your results.**

1. By email

- An automated report will be sent directly to your email address.
- Add harvest-recolte@grainscanada.gc.ca to your contacts to prevent delays and check your junk mail folder in case your email's filters sent our reports there.

2. Online at grainscanada.gc.ca/hsp

- Creating a new account**
If you have never accessed your Harvest Sample Program results online before, you must create an online services account. You can then link it to your Harvest Sample Program account by entering your producer identification number and your first and last name.
- Log into your existing account**
If you created your online Harvest Sample Program results account before December 2019, log in using your producer identification number or email. You'll be prompted to reset your password.

3. By telephone toll-free via our automated system at 1-888-324-2248

Note: Grading factors are not available via telephone

4. At an agricultural show by visiting a Canadian Grain Commission booth

5. By fax or mail (only available upon request)

Please keep these numbers.
Your results will be available until April 1, 2021
